SUMMARY

4 years of hands-on experience in Manual Software QA, Data Analysis, and Application Support, supported by a solid background in Web Development. I specialize in creating clear and effective test cases, performing UAT and regression testing, analyzing and transforming datasets, and handling end-to-end application support across L1–L3 for global clients.

WORK EXPERIENCE

Associate Technical Specialist II

Alliance Software Inc., Hippodromo Cebu City, Cebu 6000 *November 2022 - Present*

- **Manual Software QA** - Handled manual QA and UAT testing to ensure web applications were reliable and user-friendly, performed regression testing to validate updates before deployment, collaborated with developers to resolve issues, and clearly communicated findings to both technical and non-technical stakeholders.
- **Data Analysis** - Analyzed and transformed data using Power BI, Excel, and SQL, managed CEMS processes with audit validation, built dashboards for insights, and collaborated with teams to improve data workflows and reporting and Application Support - Provided L1–L3 application support to international clients, resolving issues efficiently, documenting solutions, and collaborating with teams to improve system stability and performance.

EDUCATION

Bohol Island State University, August 26, 2022
Bachelor of Science in Computer Science
San Isidro Calape, Bohol

PROGRAMMING AND SKILLS SUMMARY

- **Software QA Tester -** Skilled in functional, regression, and UAT testing, with experience in test documentation, test plans, and reporting, acceptance criteria review, REST API testing using Postman, HTTP methods and status codes, request/response validation, bug tracking tools, and UI/UX behavior analysis.
- **Data Analysis** - Skilled in Power BI, Power Query, Excel, PostgreSQL, and MSSQL, with expertise in data cleaning, transformation, visualization, and business/data validation.
- **Web Development** - Knowledgeable in web development using HTML, CSS, JavaScript, React and Typescript with a foundation in front-end technologies.
- **AI-Assisted Development:** ChatGPT (Codex), Claude, Google Gemini
- **Ticketing** - Internal Ticketing Software, JIRA, TFS
- **Soft Skills** - Strong analytical and critical thinking, problem-solving, effective communication, attention to detail, cross-functional collaboration, client and stakeholder management, adaptability, and time management skills.

PROJECTS

- **POS & Grocery Management System Testing** | Tested POS and grocery management systems by validating sales, inventory, payments, and reporting, performing regression and usability testing in real environments, and collaborating with clients to ensure alignment with business goals.
- **Data Visualization & Business Insights** | Designed interactive dashboards with key KPIs, cleaned and integrated data from Excel and SQL, and collaborated with clients to deliver accurate insights that support informed decision-making.
- **TestFlow – Test Management & QA Tracking Web Application** | React, TypeScript, Vite, Tailwind CSS, Node.js, Express, Prisma, PostgreSQL. Developed a full-stack test management application to organize projects, manage test cases, execute test runs, and track defects throughout the software testing lifecycle. Built interactive dashboards and project analytics to monitor test execution progress, pass/fail rates, defect severity, and overall QA status. Implemented RESTful API integration and PostgreSQL database management using Express.js and Prisma ORM to support persistent application data. Designed a responsive, modern user interface with reusable React components, role-based access controls, and streamlined workflows for QA teams.
